

ROBIN CLINTON

Director of Finance

- Robin Clinton, now the director of finance, graduated from Southeastern Oklahoma State University with a Bachelor of Science in management in May of 1997. Upon joining the Jameson team in 1997, she was responsible for fielding incoming calls from both clients and consultants; coordinating lecture and consult schedules (travel, conference calls, follow-up); tracking story boards for article submission to dental trade publications; processing phone/fax product orders and more.

In Spring of 1998, Clinton began to assume the responsibility of the financial management for Jameson and by summer of that same year, she was coordinating and tracking financial arrangements; accounts payable/receivable; administering the employee benefits program; preparing payroll and reimbursing expenses; making monthly and quarterly tax deposits; preparing daily/weekly deposits; processing daily credit card sales for services and products; and reconciling weekly credit card deposits.

Other team members have taken over some of her initial responsibilities as the company's growth has resulted in greater financial responsibilities and other office management needs such as purchases and orders for office supplies and products; sending information/materials to clients for Jameson consulting services; organizing files at the Jameson office; assembling files for consultants' clients; maintenance of office equipment and more. Clinton is always happy to assist clients with questions about any financial investments in Jameson, finding the perfect solution for everyone. Clinton even caters her home-cooked meals for the special events held at the Jameson Ranch, where she offices.

“Not many people are talented in finance AND in culinary arts, but we have found someone who covers all the bases. She keeps all of our finances organized and in order so we can confidently conduct business making decisions about our current situation. And she has been known to represent us well with her home-cooked meals for guests!” —Dr. John H. Jameson, Chairman of the Board, Jameson
