

TIFFANY NEWMAN

Client Development Coordinator

- Tiffany Newman serves Jameson as the Client Development Coordinator
- where she helps to enable the marketing team to fully encompass what Jameson has to offer clients.

Like many of the Jameson team members, she has many responsibilities that vary as needs arise, but a highlight of her responsibilities include assisting with the monitoring and reporting of opportunities, and tracking the advancement of potential clients in the sales process to ensure their movement in understanding the full benefits of Jameson. She provides support to the social media efforts through participation in internal social media/virtual presence planning sessions. So, often times, when you see posts from the “Jameson Mgmt” Facebook page and others, she’s behind the message. She also manages postings to Twitter, NewDocs, DentalTown and LinkedIn. Newman then takes that to the next step by managing and organizing event photographs on YouTube and Flickr for you, clients and industry friends, to enjoy.

Newman has an associates degree in diversified studies. In addition, she has a background in health care and is a licensed practical nurse (LPN). She worked in the U.S. Air Force for more than four years as a medical apprentice in a pediatric clinic. She later worked as a civilian nurse in a medical clinic.

“This position gives me the opportunity to build and maintain relationships while expanding my skills set. I appreciate every day as it brings something new to my plate and I am grateful to be a part of the Jameson team.” —Tiffany Newman
