

Technology

- Do you feel strained for time to make the right technological choices for your practice?
- Would you like to know more about new technology advances to help you choose which new products will work well with items you already have in your practice?
- Do you need new technology, but need help researching the information to make the right choices?
- Do you feel you and your team can get more out of the technology you already have?
- Are you building a new facility and need assistance in layout and product selection?

High Tech Can Make You High Profits!

Let us help you with office automation, integration & technology.

Technology can be daunting for anyone in any practice. It takes someone who knows those technologies and is dedicated to only that area of your practice to make the difference for you and your team. Through our partnership with CSG HealthNet, we offer third party, unbiased recommendations and advice. You will learn how to integrate new technology into your practice. In addition, we give you and your team the necessary training to make sure you are using all of your technology to its greatest potential.

With Jameson in-office comprehensive coaching, we can turn your technology into a smooth running profit center as you address:

- How to maximize existing technology.
- What technology to purchase and implement appropriately.
- Where to place your technology in your practice.
- How to use extra-oral and intra-oral digital photography.
- Efficient office design.
- Team training and motivation for integrating technology.

We help you to explore the purchase and implementation of:

- Intra-oral and digital cameras
- Lasers
- Ergonomics and flow of the practice
- Software
- Patient education
- CAD CAM systems
- Floorplans
- Hardware integration
- Digital radiography
- In-office advertising systems

Work with Jameson experts who will help save you thousands of dollars while sparing you hours of misspent energy! Call 877.369.5558 and speak with Tabitha or Tiffany to see how we can help with your Technological Needs.

Improving Your Practice Through Comprehensive Coaching

Jameson and CSG HealthNet have teamed together to offer you technology consulting at its best!

CSG HealthNet works with established solo and group practices as well as professionals just completing training. Their approach combines an in-depth understanding of the problems and opportunities of a dental practice with technical expertise in management, contracts, economics, finance, managed care, systems, statistics, demographics, and design. Their business objective is to provide specialized, comprehensive management resources for dental practices and related organizations.
